Qualification

Education	Branch	Grades
B.E.	Mechanical Engg	64%
Diploma	Mechanical Engg	77.90%
SSC	Urdu Medium	81.23%

Projects

Project 1: Bank Management System

Description: The role of a bank is to collect public deposits and lend those deposits to help agriculture, industry, trade, and commerce expand. The bank pays lower interest rates to depositors while obtaining higher interest rates from them on loans and advances.

Responsibility:

- Full stack development using MERN stack.
- UI development by using React JS.
- Backend: For Node JS and Express-based backends.
- Mongo DB: Create Databases and Collections.
- Responsive web design by using Material UI, HTML5, CSS3.
- Implementation of connectivity with API services by using Axios.
- Custom Validation based on React JS - utilizing React Hooks

Project 2: Hotel Room Booking

Description: This system stores user information such as name, address, room preferences, payment information, and contact information. With the aid of the reach user interface, users can quickly browse and utilize the new system to reserve or search for rooms. To limit access, different privileges might be assigned to employees based on their positions.

Responsibility:

- Creating user interfaces with HTML and CSS.
- Material UI, HTML5, CSS3 responsive web design
- Creating and deploying dynamic, reusable components.
- Adding and removing code from the GitHub repository.
- Design and construct static or dynamic components in accordance with product owner specifications.

Thanks and Regards,

Mohd Azher
